

Wishing You Peace, Joy & Warmth Throughout the Winter Holidays and Always!

Winter celebrations and traditions may differ from home to home, and town to town. Yet each share one commonality – the welcoming into a new year, a warming light in the middle of winter, and a reason to come together and celebrate.

From our family to yours, we wish you the best throughout the holiday season. Here's a little informational "stocking stuffer" that can help you use energy wisely while staying warm and comfy, and keep a little extra cash in your wallet.

Yes, you can be cozy while using energy conservatively.

Simply set your programmable thermostat to as low as is comfortable — possibly a few degrees cooler at night or when nobody is home. Close off rooms that are not being used or do not need to be heated.

If safe to do so, clear snow and ice away from outdoor vents, chimneys, and flues to prevent blocking any ventilation.

Please also remember this is an important time of year to maintain regular contact with us, especially if you are not on automatic delivery; giving us both ample time to arrange a refill well before chancing any service interruption.

[Paraco](#), we fuel your every day.
